

REMARKS

Applicant proposes to amend the **Title** and the **Abstract** and **Summary of the Invention** sections merely so that they comport with the invention as claimed in this particular continuation application.

Applicant respectfully requests that the title be changed to **"NEUROVASCULAR COIL SYSTEM AND INTERFACE AND SYSTEM THEREFOR AND METHOD OF OPERATING SAME IN A PLURALITY OF MODES."** This is because the current title does not convey the full import of the invention claimed in the present continuation application. The current title, in fact, was a carryover from the parent application in which a different invention was claimed.

M.P.E.P. §608.01(a) states that a title "should be brief but technically accurate and descriptive." As for the brevity, 37 C.F.R. §1.72(a) requires the title to be as "short and specific as possible" and "may not exceed 500 characters in length."

The proposed title is technically accurate and descriptive, at least to the degree required by 37 C.F.R. §1.72(a) and M.P.E.P. §608.01(a). It is clearly indicative of the invention to which the claims are directed. The proposed title is also well within the 500-character limit imposed by 37 C.F.R. §1.72(a).

Applicant also respectfully requests that the proposed changes to the **Abstract** and **Summary of the Invention** sections be accepted. As with the title, these sections have been revised herein merely to comport with the invention claimed in this continuation application.

Rule 312 Amendment

U.S. Application Serial No. 10/082,818

For the foregoing reasons, Applicant respectfully requests entry of the amendments proposed herein before issuance of the application.

CONCLUSION

In this Rule 312 Amendment, Applicant proposes minor revisions to the application involving the **Title**, the **Abstract** section, and the **Summary of the Invention** section. Applicant requests entry of the amendments proposed herein before issuance of the application.
